

Software Release Notes

3Z RF Vision Software Version 2.12.15 Available

06 Oct 2025

Description

The latest released software version for the 3Z RF Vision antenna alignment tool has changed from Version 2.11.9 to Version 2.12.15.

New Features:

- Added an "AGL Height" option on the height Measurement menu.

Improvements:

- Automatically recognize Chinese language in CSV documents without additional steps in Excel.
- Antenna names can now be 64 characters long, and some special characters are allowed in Site/Sector/Antenna names.

Fixes:

- N/A.

Download Instructions

The installation package can be downloaded from our customer portal at shop.viavisolutions.com (Login required).
